

MODELS/SPECIFICATIONS/COST

Fluency Device Models

Fluency device models from SpeechEasy are all...

- Small
- Comfortable
- Ergonomic

SpeechEasy fluency devices are offered in four highly ergonomic models. They include:

- SpeechEasy instrument worn behind the ear (BTE)
- SpeechEasy instrument worn in the canal (ITC)
- SpeechEasy instrument worn completely in the canal (CIC)
- The New Comfort Fit device (CF)

The latter is the *newest advancement in fluency devices made* and has several distinct advantages. Please contact your nearest SpeechEasy provider to find out if the Comfort Fit device is available in your area.

All of these fluency device models are custom fit to the individual user's ear canal using either an ear mold impression to ensure a perfect fit or an ergonomically sized sound tube that fits close the users ear.

Below are the specifications and cost for each model.
